DENNIS G. PEZAN

West Point, NY 10996
dennis.pezan@westpoint.edu ◇ (815) 592-6927 ◇ Security Clearance: Secret

EDUCATION

B.S. in Operations Research, **United States Military Academy** Expected 2029

– Minor in Artificial Intelligence ◇ Finance Specialization ◇ CQPA: 3.571 ◇ Dean's List (Fall 2025, Spring 2026) ◇ Stokes Writing Fellow ◇ Sea to Shining Sea Fellow

RESEARCH EXPERIENCE

Undergraduate Researcher, Department of Mathematical Sciences, USMA 2026 - Present

– Modeling adversary interdiction of Taiwan's crude oil supply with LTC Matthew Webb, extending his reinforcement-learning approach to maximum-flow network interdiction
– Built a 57-node, 79-edge open-source network with sourced capacities and seven costed adversary actions, verified against an independent max-flow calculation

AI Research Intern (AIAD), Transformation Decision Analysis Center, Fort Lee, VA 2026

– Redesigned the reward function for a PPO reinforcement-learning resupply agent in Logistics Battle Command, the Army's sustainment simulation
– Built diagnostic tools that exposed four reward flaws; the retrained agent more than tripled requests filled and beat a hand-coded priority-aware baseline across 101 seeds

Independent Study in Machine Learning, Department of Mathematical Sciences, USMA 2025 - 2026

– Independent study of decision trees, bagging, and random forests (MA289) under LTC Patrick Kuiper; presented findings, built an interactive research site, and gave a live AI-assisted coding demonstration to deployed officers

PROFESSIONAL DEVELOPMENT

Sea to Shining Sea Domestic AIAD, Defense Technology and Innovation 2026

– Engaged Palantir (Project Maven), Stanford's Gordian Knot Center, OpenAI, Apple, and Meta; observed technology integration at the 4th Infantry Division and U.S. Northern Command

LEADERSHIP AND SERVICE

Cadet Ambassador, CLD-STEM Program, USMA 2025 - Present

– Represent West Point at advisory boards in Chicago and Los Angeles; 50+ hours of STEM mentorship

Certified Tutor, Center for Enhanced Performance, USMA 2025 - Present

Department Manager, McDonald's, Plainfield, IL 2022 - 2024

– Scheduled 80+ employees weekly and managed $20,000+ in weekly supply orders; youngest department manager in the region

SKILLS

Python, Java (Spring Boot), SQL, JavaScript (React), Microsoft Fabric, Kafka, REST APIs, Git/GitHub
Certifications: JPMorgan Chase Software Engineering Job Simulation; Microsoft Fabric Data Architecture (2026)
Spanish (fluent)
